

Urban Research Program

2008 Seminar Series

Sean Sloan - URP

Forest regeneration & socio-economic development in Panama

This seminar critically reviews the evidence for tropical forest transitions with a case study from Panama. It presents in outline an impending national-scale study which will test and refine tropical forest transition theory.

Sean Sloan graduated with a Masters of Arts (Neotropical Geography) from McGill University and The Smithsonian Tropical Research Institute.

Wednesday 27 February 2008

12.15 p.m. - 1.30 p.m.

Nathan Campus - Room N55 1.12
