

Presents

The Griffith Science Club After School Discovery Workshops

Discovery Workshop - Slime, Goop and all Things Sticky

Students make and explore the properties of fluids and discover how 'sticky' water really is.

Discovery Workshop - Investigative Physics

Students work like real scientists using the scientific method to perform physics investigations.

Discovery Workshop - All that MATTERS

Students investigate the properties of different materials and how altering properties changes the usefulness of certain objects.

Discovery Workshop - Bubbles on the GO!

Students investigate the properties of bubbles, create cube shaped bubbles, are enclosed in wormhole bubbles and investigate the perfect bubble mixture.

Discovery Workshop - Fun with Air Pressure

Students explore air pressure and how this enables the magic of flight. Students will also get a chance to experience the power of the 'Airzookas'.

Discovery Workshop - The Sounds of Science

Students investigate sound and how it travels, make music and create unusual instruments including kazoos to GO!!!

Discovery Workshop - Illusions and Perception

Students investigate whether seeing really is believing in this amazing workshop that makes you challenge your own senses.

*Fun and learning are
not mutually exclusive*
