Outlaws in Medieval and Early Modern England

Crime, Government and Society, c.1066–c.1600

Edited by John C. Appleby, Liverpool Hope University, UK and Paul Dalton, Canterbury Christ Church University, UK

With some notable exceptions the subject of outlawry in medieval and early modern English history has attracted relatively little scholarly attention. This volume helps to address this significant gap in scholarship, and encourage further study of the subject, by presenting a series of innovative essays, based on original research and covering an extensive period of time. It focuses attention on the importance and diversity of people who crossed the boundary between legal and illegal activities and enterprise, but who have so far received uneven coverage from scholars. The essays have been specially commissioned by the editors from an experienced group of international scholars, giving the collection a strong inner coherence, enabling key themes to emerge clearly.

The Honourable Roger North, 1651–1734

On Life, Morality, Law and Tradition

Jamie C. Kassler, Australian Academy of Humanities, Australia

'Jamie Kassler is the leading authority on Roger North, and over the years she has been responsible for careful and illuminating editions of North's writings. Her new edition of Of Etimology continues this invaluable editing work. It also provides a monograph-length essay on North's conception of the persona of the natural philosopher and humanist, integrated into a thoughtful treatment of his life. This essay provides what is now the best starting point for readers coming to North for the first time.'

—Stephen Gaukroger, University of Sydney, Australia.

Roger North (1651–1734) is known today as a biographer and writer on music, architecture and estate management. Yet his writings, including thousands of pages still in manuscript, also contain critical reflections about intellectual and social changes taking place in England. Eschewing the 'Whig' stereotypes of North, Jamie C. Kassler provides the first interpretation of his philosophy. She reveals that North, a common lawyer by profession, combined the morality of the sceptic, Montaigne, with the jurisprudence of the common lawyers, Coke, Selden and Hale. This unusual combination grounded North's critical reflections on the dogmatism of natural-law doctrine, both in its medieval intellectualist version and in its voluntarist reformulation that began with Grotius and was developed by Hobbes, Pufendorf and Locke.

Narratives of Women and Murder in England, 1680–1760

Deadly Plots

Kirsten T. Saxton, Mills College, USA

Arguing for the centrality of the female criminal subject to the rise of the British novel, Kirsten Saxton compares representations of homicidal women in legal documents with those in the early novels of Behn, Manley, Defoe, and Fielding. She demonstrates that legal narratives informed the novel's evolution and fictional texts shaped the development of legal narratives, and suggests that Augustan configurations of the murderess continue to influence our legal and social conceptions of femininity.

Natural Law and Laws of Nature in Early Modern Europe

Jurisprudence, Theology, Moral and Natural Philosophy

Edited by Lorraine Daston and Michael Stolleis, Max-Planck-Institut für Wissenschaftsgeschichte, Germany

This impressive volume is the first attempt to look at the intertwined histories of jurisprudence and science in early modern Europe. Taking an interdisciplinary approach these articles stimulate new debate in the areas of intellectual history and the history of philosophy, as well as the natural and human sciences in general.

Abstractions of Evidence in the Study of Manuscripts and Early Printed Books

Joseph A. Dane, University of Southern California, USA

In this book, Joseph Dane critiques the use of material evidence in studies of manuscript and printed books by delving into accepted notions about the study of print culture. He questions the institutional and ideological presuppositions that govern medieval studies, descriptive bibliography, and library science. This volume is an important contribution to debates about the nature of bibliography and the critical institutions that have shaped its current practice.
