

7117GFS

Animation Timing and Character

Semester 2 - 2007

Academic Organisation:	Griffith Film School
Faculty:	Queensland College of Art
Credit point value:	10
Student Contribution Band:	Band 1
Course level:	Postgraduate
Campus/Location/Learning Mode:	South Bank / On Campus / In Person
Convenor/s:	Mr John Eyley (South Bank)
Enrolment Restrictions:	Restricted: Approval from Head of School
This document was last updated:	26 June 2007

BRIEF COURSE DESCRIPTION

This course focuses on developing skills in timing for animation specifically examining the technical and aesthetic processes involved in creating character actions and emotion. Students explore the application of these principles in 'pencil-form' animation.

Restriction: Student must be enrolled in a QCA or GFS Program

SECTION A – TEACHING, LEARNING AND ASSESSMENT

COURSE AIMS

Course Aims

In order to further the student's exploration of traditional character animation it is imperative to examine the dynamics of articulated movement and gesture of the human-based form. Understanding these dynamics is essential in being able to build on a foundation of knowledge that the animator can draw on in the application of **any** future animation technique. The exacting nature of analysing a range of actions of the figure through practical studio animation assignments will give the student confidence in their animation abilities in preparation for more subtle and overt acting techniques later in the programme.

Performance animation, especially the form needed for animated storytelling, requires a complex set of skills that combines in the technical control of intricate movements of complex forms in space as well as a feeling for timing and acting.

The chosen method for doing this in this course is through pencil animation at the lightbox. In this way the student experiences intimately the sometimes complex judgements that are needed to bring animated characters to life. Pencil animation technique is a strong cognitive process that requires the animator to visualise clearly the form and movement of a character before committing to paper and the screen. Through the physical nature of drawing lines on paper that follow the animator's perceptual processes the learning is deeper and exercises the visual and spatial reasoning of the brain that is necessary in creating animated performances. Coupled with this is the need for the animator to understand that characters think and act and how this translates to illustrating actions and emotions in animation form. Also to further develop the student's drawing skills, life drawing classes will be undertaken.

Complementing this process will be observational studies of historical and contemporary animated works to examine further animation principles and techniques. Focus will be on action analysis of specific animated films and how animators bring their own specific styles to the art; and a brief overview of animation histories and technique that will inform the student on the range of techniques possible.

LEARNING OUTCOMES

By the completion of this course the student will have achieved the following outcomes -

1. have developed sound drawing skills that prepare the student for the rigours of character animation
2. have applied appropriate timing and animation principles for convincing character animation.
3. be able to demonstrate a sound understanding of the pencil animation studio process.
4. have developed an understanding of gesture and expression in character animation.
5. an ability to apply the basic processes of visual problem solving for animation.
6. be able to demonstrate knowledge of significant animated films, forms, and authors and their particular contribution to the art form.

CONTENT, ORGANISATION AND TEACHING STRATEGIES

Organisation of this course is based on the weekly **lecture / tutorial** structure. Students are required to attend one lecture, one tutorial, and one life drawing session per week for this course.

Lectures present the formal course content, film screenings, assignment critiques, technique demonstrations, and class discussion. Students should keep a record of the lectures and discussions that occur during these sessions, and organize in a suitable folder any class handouts, for use in the studio tutorials, and for revision in preparation for the examination.

Animation Studio tutorials require the student to carry out work in the animation studios in and out of scheduled class times. Studio activity includes weekly animation studies and progressive work on longer term assignments. The animation studio learning environment provides access to specialized equipment and extra instruction for one-on-one instruction and feedback on assignments. Students are also expected to work outside class times in the studio or on their own equipment as a substantial amount of work will need advancement before subsequent classes. Students are reasonably expected to allocate a minimum of 10 hours study per week to this course, including lectures and assignment work. All set exercises and assignments are progressive and formative. Students are expected to provide their own drawing materials, computer data storage, and home animation equipment. It is also required to complete all practical exercises and assignments for the successful transition through this course.

Learning@Griffith:

At the beginning of each studio project printed information is provided that outlines the details for the assignment. The GU web site Learning@Griffith (Blackboard) will also provide all details for the progress of the course. Students will find the Course Outline, assignment outlines, and deadline information, as well as additional information that will assist the student in their learning in this course. Students are encouraged to use the communication section of L@GU for forums and email to increase effective learning.

Students are required to supply their own art materials (pencils, paper, paints, crayons, inks, CD-RWs, , etc.) although some specialist materials may be supplied for specific classes. A materials list will be available to students at the beginning of the semester. This method of providing a complementary relationship between studio theory, studio practice, and individual instruction will be the most effective use of the teaching and learning environment.

Attendance and class participation:

Students are advised to attend all lectures and studio tutorials as updating of topics and comment on current work frequently occurs. This can impact on the progress of the student's own work. Attendance is an essential part of the study cycle here and contributes to some assessment components by way of the student's overall learning through personal skill development. Class participation and discussion also recognises that valuable learning occurs during classroom interaction and is a valued part of this course.

CONTENT SUMMARY

Content

In order to fulfil the aims of this course the content has been organised into three areas of study: Human-based Character form and Gesture animation; Life Drawing; and Film analysis.

Human-Based Character Movement (The articulated figure):

Here studies in the lightbox studio will focus on broad animated movements of a bipedal animated character. The **walk** and **jump actions** represent everyday actions that together neatly embody a comprehensive range of animation problems that appear in almost all other animated actions. In animating a convincing walk cycle the animator expresses personality, weight, complex movements of articulated limbs, and cyclic action that must refer to a background. The jump combines explosive and subtle timing of movement in a dynamic sequence of drawings while at the same time endeavouring to capture character. In both these exercises the aim is to convincingly illustrate through animated drawings that the characters live in a world of gravity and Newtonian laws of physics which must be communicated to the audience. The audience must be able to empathise with these characters and respond to their actions in a believable manner. This can be achieved through well conceived and choreographed animation.

Gesture Animation:

This aspect of studio work introduces the student to the basics of acting in animation and pencil drawing method. Narrative storytelling in animation demands that animated characters be convincing in their actions which means that gesture and expression are necessary areas of study. A broad understanding of physical gesture gives character animation more meaning and audience appeal when delivering acting performance, especially when dialogue is used. This area of study provides a sound basis for a deeper understanding of character and personality in acting in second year coursework. Each student experiences studio animation method through creating

key drawings, working with X-sheets, and completing in-betweens for another student, before completing the filming of the drawings.

Film and form analysis:

Throughout the semester a broad range of animated films will be presented in the lectures for analysis that illustrates the scope of animation technique, form and topics of interest. The films will also back up specific studio assignments being covered at the time in the studio assignments. The intention here is also to inform the animation student of the varieties of animation techniques, significant films and animators that have made an impact on the art of animation. Students are encouraged to record and file lecture notes and read as widely as possible on the content topics throughout the semester. The content here will be the focus of the examination component of assessment.

Life Drawing:

Life drawing is a drawing discipline that works on a couple of levels. It increases drawing and visualising skills with hand created images and develops knowledge of the structure of the human form. Drawing skills are implanted all through the animation curriculum regardless of the technique chosen - from conceptual sketches and storyboards to presentation designs and finished animation linework. Knowledge of the structure of the human body is essential in being able to construct animation characters with an understanding of how the figure moves,

WEEKLY SCHEDULE OF CONTENT:

The following table lists on a weekly basis the lecture and tutorial topics, assessment deadlines, and film titles that are presented each week. The films screened during the lecture for film analysis are selected from the Screening List and all may not necessarily be screened on the day. Occasionally, other films not listed here may be shown.

Topic	Lecture Content	Tutorial/Laboratory Content	Assessment	Screening List
1.	Character Animation <i>It's all about empathy ... or was that sympathy?</i>	<ul style="list-style-type: none"> ▪ 'Balloon' ▪ Weight; path of action; Newton's Laws of Physics. ▪ Creating the character model – walk ready. ▪ The Walk Cycle ▪ Life Drawing 		<i>Tex Avery</i> <i>Shrek</i> <i>Bugs Bunny</i> <i>Fantasia</i>
2.	The Walk Cycle <i>Move those feet!</i>	<ul style="list-style-type: none"> ▪ Animation workshop - Arm ▪ The Walk cycle <ul style="list-style-type: none"> ▪ - The 4Key frames ▪ Life Drawing 		<i>Robin Hood</i> <i>Ice Age</i> <i>Thief and the Cobbler</i>
3.	Walk cont'd <i>Get the slide right</i>	<ul style="list-style-type: none"> ▪ Workshop: Hand 1 ▪ Walk Cycle: Inbetweens / <i>Eadweard Muybridge</i> ▪ Life Drawing 		<i>Walking</i> <i>The Sword in the Stone</i>
4.	Walk cont'd	<ul style="list-style-type: none"> ▪ Workshop - Scribble ▪ Run / other cycles ▪ Life Drawing 	Due: Walk 4:00pm Friday	<i>France</i>
5.	The Jump <i>It's all in the preparation...</i>	<ul style="list-style-type: none"> ▪ Workshop - Eye ▪ A question of Fast action ▪ Life Drawing 		<i>The Hulk</i> <i>Jumping</i>
6.	Jump cont'd <i>...As well as the landing.</i>	<ul style="list-style-type: none"> ▪ Workshop - Hair ▪ ...And to subtle action ▪ Life Drawing 		<i>The Iron Giant</i>
7.	Gesture & Expression <i>Express yourself</i>	<ul style="list-style-type: none"> ▪ Workshop - Head turn ▪ Thumbnails ▪ The sound track ▪ Breaking down dialogue ▪ X-sheet 	Due: Jump 4:00pm Friday	<i>Who Framed Roger Rabbit</i>

Topic	Lecture Content	Tutorial/Laboratory Content	Assessment	Screening List
		<ul style="list-style-type: none"> Life Drawing 		
8.	Gesture & Expression	<ul style="list-style-type: none"> Workshop - material Key animation Clean up Life Drawing 		TBA
9.	Stop-motion Animation	<ul style="list-style-type: none"> Workshop - Hand 2 Key animation Inbetweening 1 Life Drawing 		<i>Wallace & Grommit</i> <i>Harvey Krumpet</i> <i>Augusta Feeds Her Child</i> <i>Street of Crocodiles</i>

13	Where to from Here?	<ul style="list-style-type: none"> Studio Student presentations 		<i>Grave of the Fireflies</i>
14.	Studio Access (no lecture / tutorial)		Due: Gesture Animation 4:00pm	
15.			On-Line Exam Wednesday	

ASSESSMENT

Summary of Assessment

Item	Assessment Task	Length	Weight	Total Marks	Relevant Learning Outcomes	Due Day and Time
1.	Physical Animation	Assessment reel - as advised in assessment outline	30%	100	1, 2, 5	Part A, Friday, week 4, 4:00pm Part B, Friday, week 7, 4:00pm
2.	Gesture Animation	20 secs	40%	100	1, 2, 3, 4, 5	Week 15, Friday 4:00pm.
3	Life Drawing Folio	Folio	15%	100	1	Week 13 Friday 4:00pm

4.	Examination	1 hour	15%	40	3, 6	Venue: TBA
----	-------------	--------	-----	----	------	------------

Assessment Details

Note:

1. ALL assignments are to be submitted to the GFS School secretary with cover sheet by the due date where it will be date-stamped before collection by the lecturer.
2. All assessment items are to be attempted and submitted to achieve a passing grade.

Assessment is progressive and according to criteria specific to each item. All student work is to be submitted for assessment on or before the due date. Group critiques will review the body of student work. Extensions will be granted only on the provision of a medical certificate (or in exceptional circumstances with a letter from the student counsellor).

The assessment criteria take into account the student's quality and extent of inquiry into the set problems as evidenced by both the process (development in the studio) and the product (the finished assessment item).

1. Physical Animation: 30%

Assessment of this task involves the completion of a folio of animation items, all to be handed in by the deadline. The folio includes three parts including the **Walk, Jump, and Workshop assignments**, which are to be submitted together on the one demo reel. Together these parts achieve the sum of the aims of broad physical animation component of the course. The class is given instructions for each task which will be resolved into short animated sequences created in the studio and saved (burned) to a CD for submission.

A more detailed description of the task, assessment criteria, and submission details will be handed out in class and will appear on Learning@Griffith at the start of each assignment.

Individual assessment here will provide feedback to the student on their demonstrated skill level and understanding of the criteria.

Criteria:	1. Drawing / Structure clarity & consistency	30%
	2. Character expression	20%
	3. Timing and application of principles	40%
	4. Development and participation	10%

2. Gesture Animation: 40%

Assessment for this item involves the review of an animation sequence produced as an assignment. Assessment will take into account the student's application of pencil animation process, and their demonstrated understanding of animation timing for gesture, character, and weight.

A more detailed description of the assignment and assessment criteria will appear on Learning@Griffith at the beginning of week 7.)

Criteria:	1. Development	10%
	2. Participation	10%
	3. Drawing / Structure consistency	20%
	4. Timing and Principles	30%
	5. Character gesture	30%

3. Life Drawing: 15%

Students will receive feedback provided on their studio progress throughout the semester. Final folio of drawings will be assessed in week 13 in a one on one studio presentation. A presentation schedule will be posted in week 12 on Learning@griffith. The final folio is to consist of a selection of drawings in consultation with the lecturer.

Criteria:		
	1. Structure	30%
	2. Expression	30%
	3. Presentation	20%
	4. Attendance	20%

4. Exam (On line): 15%

This examination will determine the depth of the student's knowledge and understanding of animation form and techniques, terminology and conventions of production practice that has been in the lectures and tutorials.

Return of Assessment Items

All assessment items and feedback sheets will be returned to students during class time and available for pick-up within two weeks from the submission deadline. This includes the final assignment which if not available in the studio should be available from the school secretary

Notification of Availability of Feedback on Assessment

Announcements on the availability of feedback sheets will be made in the class lecture and announced on Learning@griffith.

GRADUATE SKILLS

Graduate Skills	Taught	Practised	Assessed
Effective communication (written)	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Effective communication (oral)	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Effective communication (interpersonal)	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Information literacy	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Problem solving	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Critical evaluation	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Work autonomously	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Work in teams	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Creativity and innovation	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Ethical behaviour in social / professional / work environments	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Responsible, effective citizenship	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Professional Skills

Convenors *are encouraged to* add extra skills information where appropriate, for instance, in the case of discipline specific graduate skills. Convenors may wish to add a similar table with rows reflecting the additional professional skills/ discipline-related skills.

TEACHING TEAM

Course Convenor

Convenor Details	South Bank
Campus Convenor	John Eyley
Email	J.Eyley@griffith.edu.au
Office Location	SO2_5.20 (Webb Centre)

Phone	07 373 53174
Fax	07 373 56123
Consultation times	Wednesdays 9:00 am – 12:00pm

Consultation times	

COURSE COMMUNICATIONS

Consultation times are available students who should make use of the face-to-face tutorial sessions as effectively as possible since staff are not always readily available at other times.

At the beginning of each studio project printed information is provided that outlines the details for the assignment. The GU web site Learning@griffith (Blackboard) will also provide all details for the progress of the course. Students will find the course outline; all assignment outlines, and deadline information, as well as additional information that will assist the student in their learning in this course. Students are also encouraged to use the communication section of L@GU to increase effective learning and should check Learning@Griffith at least once in each week.

Students may use e-mail to communicate with teaching staff outside face-to-face class time.

SECTION B – ADDITIONAL COURSE INFORMATION

Students should refer to the Learning@Griffith website for further information about this course.

Assignment Extensions and Penalties	Extensions will be granted only on the provision of a medical certificate (or in exceptional circumstances with a letter from the student counsellor). For studio assignments a penalty of 2% per day will need to be applied to late submissions.
Copyright	All student work is copyright owned by the student. From time to time some student work may be requested for university use such as promotion. In this case there is a university form to be signed by the student should they agree.
Course Evaluation	This course will be evaluated at the end of the semester and students will be informed of the process in due course.
Examinations	The examination will be conducted under controlled conditions in a QCA computer laboratory (to be advised).
Risk and Health & Safety	It is important for all students to be aware of Health & Safety in the study environment. Staff are constantly monitoring the animation rooms for this but should the student at any time be aware of unsafe practices or conditions in the area please report them promptly to the immediate staff available.

SECTION C – KEY UNIVERSITY INFORMATION

ACADEMIC MISCONDUCT

Students must conduct their studies at the University honestly, ethically and in accordance with accepted standards of academic conduct. Any form of academic conduct that is contrary to these standards is academic misconduct, for which the University may penalise a student. Specifically it is academic misconduct for a student to:

present copied, falsified or improperly obtained data as if it were the result of laboratory work, field trips or other investigatory work;

include in the student's individual work material that is the result of significant assistance from another person if that assistance was unacceptable according to the instructions or guidelines for that work;

assist another student in the presentation of that student's individual work in a way that is unacceptable according to the instructions or guidelines for that work;

cheat; (Cheating is dishonest conduct in assessment);

plagiarise (Plagiarism is knowingly presenting the work or property of another person as if it were one's own.)

Visit the University's [Policy on Academic Misconduct](#) for further details.

PLAGIARISM DETECTION SOFTWARE

In semester 2, 2007 the University is piloting the use of plagiarism detection software. Students should be aware that your Course Convenor may use this software to check submitted assignments. If this course is included in the pilot your Course Convenor will provide more detailed information about how the detection software will be used.

KEY STUDENT-RELATED POLICIES

All University policy documents are accessible to students via the University's Policy Library website at: www.griffith.edu.au/policylibrary. Links to key policy documents are included below for easy reference:

[Student Charter](#)

[Academic Standing, Progression and Exclusion Policy](#)

[Student Administration Policy](#)

[Policy on Student Grievances and Appeals](#)

[Assessment Policy](#)

[Examinations Timetabling Policy and Procedures](#)

[Academic Calendar](#)

[Guideline on Student E-Mail](#)

[Health and Safety Policy](#)

UNIVERSITY SUPPORT RESOURCES

The University provides many facilities and support services to assist students in their studies. Links to information about University support resources available to students are included below for easy reference:

[Learning Centres](#) - the University provides access to common use computing facilities for educational purposes. For details visit www.griffith.edu.au/cuse

[Learning@Griffith](#) - there is a dedicated website for this course via the Learning@Griffith student portal.

[Student Services](#) facilitate student access to and success at their academic studies. Student Services includes: Careers and Employment Service; Chaplaincy; Counselling Service; Health Service; Student Equity Services (incorporating the Disabilities Service); and the Welfare Office.

[Learning Services](#) within the Division of Information Services provides learning support in three skill areas: computing skills; library skills; and academic skills. The study skills resources on the website include self-help tasks focusing on critical thinking, exam skills, note taking, preparing presentations, referencing, writing, proof reading, and time management.
