Michael Kane

Connecting urban knowledge economies

In the global knowledge economy Australia’s long term future relies on its cities. This presentation argues, using Perth WA as an example, that the urban planning priority should be on connecting knowledge economy production centres such as universities with radial-orbital rail systems.

Michael Kane is undertaking a Masters of Sustainability at the Curtin University and is employed as the Principal Advisor to CEO of the Urban Land Development Authority; previously Michael worked as a Principal Advisor to Western Australian Minister for Planning and Infrastructure.

Tuesday 31st August
12.15 p.m. - 1.30 p.m.
Nathan campus - Building N55, Room 1.12
