Transcript of video of Luke Salmon – Bachelor of Medicine/Bachelor of Surgery Student.

Luke Salmon was going to become an electrician before he made the life changing decision to study Bachelor of Biomedical Science at Griffith University.

My Dad and grandfather were electricians, and I was going to become one too.

But that changed when a life-saver I knew brought a young man back to life on this beach.

It was at that moment I knew I wanted to become a doctor.

So I got a Bachelor of Biomedical Science at Griffith. It was my pathway to a Griffith medical degree and on to Griffith Honours College.

And Dad and Grandpa? Well they’re getting used to the idea.

Griffith University, when you know more, you can do more.
