Australian Rivers Institute
Water Science PhD Scholarships

Five PhD Scholarships are being offered as part of the new Area of Strategic Investment Water Science at our Nathan or Gold Coast campuses.

Preference will be given to candidates with interests and skills in the following research areas:

- Ecohydrology or remote sensing of river and wetland systems
- Ecological/conservation modelling of aquatic ecosystems
- Aquatic chemistry, biogeochemistry or ecotoxicology

Requirements: The successful applicant will have: BSc (Hons 1 or 2A) or Masters Degree in one of the listed research areas; a strong research record; excellent communication skills; and fieldwork experience.

Scholarship value: AUD$30,000 pa for 3 yrs. The stipend will also cover research costs, and includes access to research laboratories, field equipment (inc 4WDs), research higher degree training and access to excellent water science researchers.

Candidates will be expected to meet the enrolment requirements for the Griffith School of Environment and have identified a principal supervisor from the Australian Rivers Institute. For information about our research staff visit www.rivers.edu.au

To apply for the scholarship, please visit http://www.griffith.edu.au/research-higher-degree/how-to-apply. It is recommended that you also send an email to Professor Jane Hughes jane.hughes@griffith.edu.au stating that you are applying for the scholarship.

Closing date for applications is 31 October, 2009.
