Transcript for Video About Griffith

**Professor Ian O'Connor**
We're creating one of the great student centred research intensive universities of the Asia Pacific.

**Student 1**
The excitement of researchers is contagious.

**Student 2**
The lecturers in the University really know what they are talking about.

**Student 3**
Griffith provides a lot of opportunities to get involved into real life situations.

**Professor Ned Pankhurst**
The recent excellent for Research Australia Ranking Exercise confirmed Griffith as a Top Ten research University.

**Professor Mark von Itzstein**
When you attract the world's best scientists into an institute like this, the best attract the best. There's no doubt about that you get the best students from all over the world, you get outstanding researchers, junior researchers that want to come.

**Student 4**
Collaborators I'll be working with are leaders in their field. They have access to world class technology.

**Student 5**
Well my mentors and also my lecturers, they just have a wealth of experience and knowledge in their specific field and it really enriches the University experience that they can pass their knowledge on to us.

**Student 3**
My supervisor has got a very large research background of his own. He's very well known around the world.

**Professor Ian O'Connor**
We're creating a comprehensive research intensive University alongside a University hospital which is being built as we speak, with extraordinary light rail public transport access to the campus. We’re creating one of the most exciting educational precincts in the country.
Well the Nathan campus is our foundation campus, it’s an extraordinary campus. It was founded to be a different type of campus, a campus which took an interdisciplinary approach to the key problems of our time. So it was established as a campus in the mid 1970’s to address the key issues that the world would face in the 21st Century. Now we’re investing very heavily in rebuilding that campus so
that's it’s contribution to the world will be as significant today as it was ten, 20 years ago.

Our Mount Cravat campus. The beautiful campus at the bushland setting which has an absolute focus on social intervention. A truly extraordinary education school, a great psychology school, and the country’s best criminology school. As we move further South towards the Gold Coast we come to our Logan campus. And that campus, again a great campus, programmes such as education, social work, nursing, teaching, that's a campus which is really a demonstration campus for research and teaching and community interventions around social inclusion. It's a campus committed to making a difference.

Professor Lesley Chenoweth
Logan campus is all about community, but of course it's also about education and research which is what we do at Griffith, and we do it really well.

Professor Ian O'Connor
The heart of Brisbane, we're in the heart of the Brisbane city. We have our South Bank campus which is the home of our film school, the Queensland College of Art and the Conservatorium of Music. These are the elite creative art institute in this State. Extraordinary facilities, extraordinary students and extraordinary staff.

Professor Huib Schippers
The South Bank campus is one of the most exciting campuses at Griffith. The film school, the College of Arts and Queensland Conservatorium are immersed in a cultural precinct, are really at the heart of the cultural precinct which also includes the Performing Arts Centre, the Gallery of Modern Art, the Museums, the ABC Radio and the orchestra. That means our students are immersed in an environment which prepares them for their future profession.

Student 6
Fantastic. They give us so much information when it comes to being a musician from history of music to how to get a job basically.

Professor Andrew O’Neil
Asia is the world’s fastest growing region economically, but it’s also the world's most dynamic and perhaps its most complex in terms of cultural and political trends. So from Australia’s point of view engagement in this region is crucial.

Student 2
The language programme in University really helped me a lot.

Student 1
It's really exciting to have international students on campus because they look at things differently so you always get a different perspective.

Professor Ian O'Connor
You'll know more if you study at Griffith University because our students work hand in hand alongside the great researchers in this country and in the world. And that, their research informs everything that we do in our curriculum, in our
teaching processes, in the buildings and the facilities that we create to optimise learning.

**Student 1**
If they are so excited about something, I want to get involved in it as well.

**Professor Ian O'Connor**
It’s a great place to learn.
