Strengthening Australia's National Integrity System: Priorities for Reform

Our Australian Research Council-funded team, led by Griffith University's Centre for Governance and Public Policy, is working with government, business and civil society to identify the key strengths, gaps, opportunities and solutions for national approaches to preventing, limiting and combatting corruption. Join us!

- Is it time for an Australian **national integrity commission**?
- What would be its **constitutional basis**?
- What are the **best lessons** from State and international experience for establishing a federal anti-corruption agency?
- What is the 'best fit' between anti-corruption agencies and the other integrity institutions at the core of our multi-agency systems - including our **ombudsmen, auditors-general, information commissioners, whistleblower protection agencies** and the like?
- What are the best models for **resourcing, coordinating** and ensuring the **parliamentary accountability** of integrity bodies?
- How can Australia return to its position as a **world leader** in the fight against public sector corruption?
