

## MYO FAN

### MATERIALS

- Paper
- Popsicle Sticks
- Scissors
- Glue Drops
- Double sided tape (optional)

### STEPS

1. Cut a strip of paper 17 cm long and 6 cm wide. **(Please see next page)**
2. Place a popsicle stick on one end of the paper and fold over it. This is the measure for all the folds. **(A)**
3. Using the fold, make a front back fold on the paper (make one fold on top and then a second fold on the back). **(B)**
4. Add glue drops or double sided tape on the top of 2 popsicle sticks. One on the back and one of the front. **(C)**
5. Paste the first stick on the back of the first fold.
6. Paste the second stick on the front of the last fold. Making it look kind of like an organ (the instrument). **(D)**
7. Take one glue drop and ball it up, by rolling it between your fingers.
8. Place the ball of glue on the bottom of the popsicle stick and paste the second stick on top of it. Because the glue is in a ball, it should allow you to fold the fan, in and out.
9. Test the fan by folding it inwards and outwards. **(F)**

## MYO FAN

Choose your colour and cut out one of these sized and ready to use 17 cm x 6 cm strips!

PS: Remember when printing this out to select "Actual size" in the print settings.

ENJOY!

*Multicultural Week*

### FUN FACT

Records show fans date back to around 3000 BC and were for functional, ceremonial and decorative use. There is a museum in London, UK that showcases this history and a collection of fans.
