Welcome

On behalf of Griffith University's Institute for Glycomics, we would like to extend a very warm welcome to everyone here tonight as we celebrate our 21st Birthday, highlighting 21 years of truly remarkable research.

Your presence, generous donations and support through the purchase of raffle tickets and auction items during the course of the night will help us in our fight against some of the world's most devastating diseases.

The Institute for Glycomics is one of Australia's flagship multidisciplinary biomedical research institutes based at Griffith University's Gold Coast campus.

Established 21 years ago in the year 2000, the Institute strives to be a world leader in the discovery and development of next generation drugs, vaccines and diagnostics in the fight against diseases of global impact.

The Institute boasts state-of-the-art facilities combined with some of the world's most outstanding researchers with a focus on 'Glycomics', a constantly expanding field that explores the structural and functional properties of carbohydrates (sugars). Glycomics research is conducted worldwide in projects that cut across multiple disciplines, applying new approaches to the treatment and

prevention of diseases. Our unique research expertise makes us the only institute of its kind in Australia and one of only a handful in the world.

The Institute's research primarily targets prevention and cures for cancers, infectious diseases and neurodegenerative disorders, with a focus on translational research which will inevitably have a positive impact on human health globally.

This rich research environment provides exceptional postgraduate education programs for the nation's future scientists.

The Institute engages with industry, other premier research institutes, philanthropic organisations and governments from across the globe to build human capital to provide healthcare solutions to address some of the world's most intractable diseases.

Director's Message

It's a great pleasure to have you all here this evening as we celebrate this incredible milestone in the life of the Institute, our 21st Birthday!

It's incredible to reflect on what we've achieved over the last 21 years and just how far we've come, and we look to the future with great enthusiasm and determination.

This evening would simply not be possible without the gracious support of our Event Partners:

- **Platinum Partner: Meriton Group**
- **Gold Partners: Eco Tan, Community Bank Paradise Point and Ormeau – Bendigo Bank**
- **Silver Partner: Lucy Cole Prestige Properties**
- **Bronze Partners: Triple M, FB Rice, BARD1 Life Sciences Ltd, The Layt Clinic**
- **Media & Support Partners: 9News Gold Coast, Gold Coast Bulletin, Fast Proof Press, Luke Marsden Photo, The Edit Suite**
- **Fireworks Partner: Spruson and Ferguson**
- **Venue Partner: RACV Royal Pines Resort**

I would also like to take this opportunity to thank the community for their generous donations of raffle prizes and auction items which form an essential part of tonight's fundraising efforts.

Our community partners, supporters and donors play such a crucial role in helping to support our ground-breaking research and human clinical trials. Precious funds raised from elegant events such as this help us in our tireless fight against diseases of global impact.

Every dollar raised tonight will go directly towards our cancer research into finding new diagnostics, cures and preventatives.

Cancer is the second leading cause of death globally and is responsible for over 9 million deaths every year. Globally, about 1 in 6 deaths is due to cancer.

The Institute for Glycomics is home to the Australian Centre for Cancer Glycomics (A2CG), a unique national resource dedicated to cancer glycomics research.

With the brightest scientific talent in the field of cancer glycomics, the A2CG is an exciting hub of truly revolutionary cancer research.

Research teams within the A2CG are currently working on new and better ways to diagnose, prevent and cure cancer.

Recent breakthroughs include the development of a promising new early detection test for breast and ovarian cancers, which may be a useful tool for early cancer diagnosis, and for the monitoring of treatment and disease.

Other areas of interest and further investigation include world-first advances in Magnetic Resonance Imaging (MRI), to better diagnose breast cancer for women who fall in the high-risk category.

Research provides hope. Hope in the fight against disease. Hope for our future. I encourage you to dig deep and help make a difference to the health of both this, and future, generations.

On behalf of Griffith University and the Institute for Glycomics, we thank you all for being here tonight. We sincerely hope that you enjoy the evening.

Penfolds RWT BIN 798 2017
Value: \$180

RWT Barossa Valley Shiraz presents an admirable alternative to the multi-regional sourcing and American oak maturation that are hallmarks of Grange, expressing instead, single region Barossa Valley shiraz matured only in French oak. Vibrant nose, initially a life of trademark tar/bitumen and subtle V.A above scents of assorted capaccio meats, steak tartare, green olive, capers and rosemary, moving to patisserie scents of almost croissant and cinnamon bun, perhaps creme burlee glaze upon sitting/swirling. On the palate, medium bodies with a firm and binding structure. Mouth watering acidity assisted by chalky tannins and absorbed integrated oak. Currently youthful and energetic, yet this vintage already impatiently awaits its secondary and tertiary maturation phases. Peak drinking: Now - 2037.
