

# How to...

Launch an application on Turbo.net

## Introduction

This guide will show you how to launch an application from Turbo.net in any of its three modes:

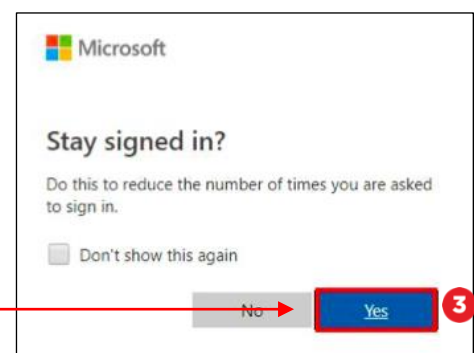

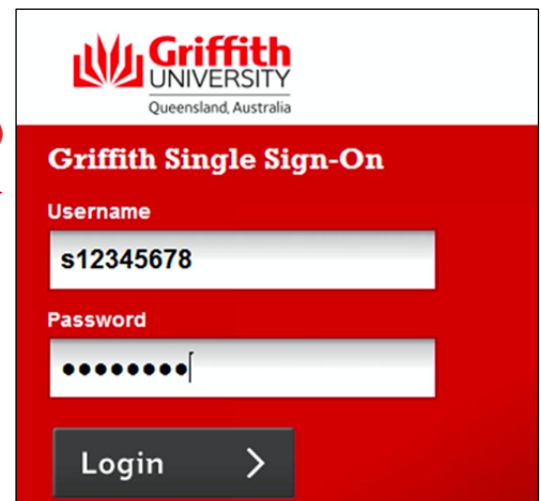

1. **Run in Cloud (HTML5):** Available on Windows and MacOS. You will be connected via your web browser to an application running on a remote server. Connect your OneDrive to Turbo.net and save all data to your **T:\OneDrive**.
2. **Run in Cloud (Windowed):** Available on Windows and MacOS. You will be connected to an application running on a remote server via an application window that will start outside of your web browser. You will have access to [save data on your OneDrive](#) as well as your local hard drive. To launch a Turbo.net application in **Windowed mode**, you must first [install the Turbo.net desktop app](#).
3. **Run on My PC (Local):** Available only on Windows PCs and virtual machines. The application will be downloaded to your hard drive and started. The application will use local resources such as RAM, processor and graphics and have access to open and save files to your local drive. You must first install the **Turbo.net desktop app** to launch an application in **Local mode**.

By default, applications will start in **Local** mode if you are on a Windows PC. You can see the other enabled modes by clicking on an application. Be aware that, for technical reasons, not all applications are available to run in **Cloud** modes.

Please be aware that some application interfaces will differ visually from what is shown in this guide.

## Step 1: Access the Turbo.net portal

- 1 Login at <https://griffith.start.turbo.net>.
- 2 You will be redirected to the Griffith single sign-on page, login using your Griffith student or staff credentials.
- 3 Select **Yes** when the Microsoft login appears.
- 4 The **Turbo.net** dashboard will appear where you can launch your desired application.

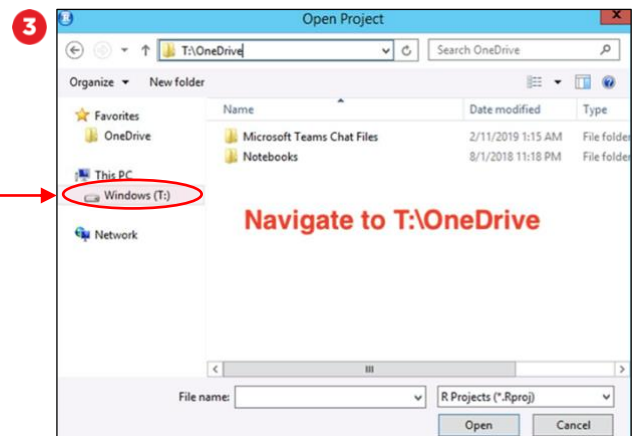

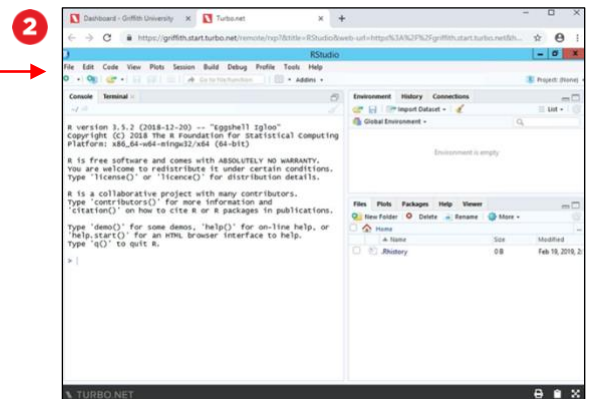

## Step 2: Run in Cloud HTML5 (suitable for all devices)

- 1 Right click the icon for the application you wish to run and select **Run in Cloud (HTML5)**.

If an application asks you to agree to terms and conditions, select **I agree**.

- 2 A new tab will open in your web browser containing the application.

- 3 Access and save your data to T:\OneDrive when using **Run in Cloud (HTML)** mode. Once you have connected your OneDrive, it will be available as **T:\OneDrive**.

## Step 2: Run in Cloud (Windowed) – suitable for Mac/Windows PCs

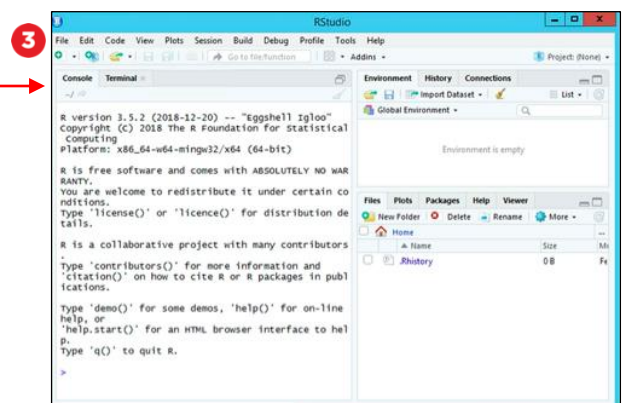

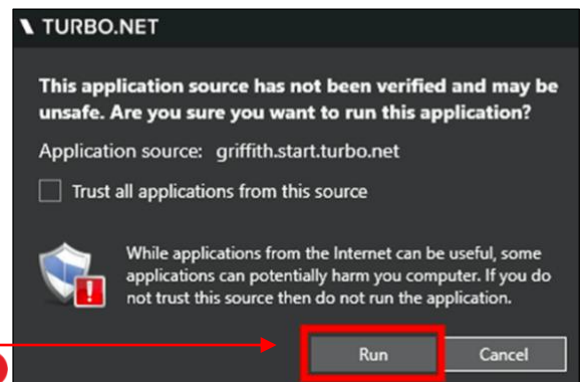

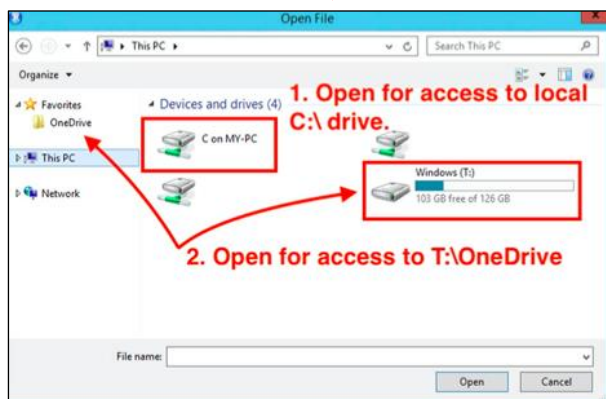

- 1 Right click the icon for the application you wish to run and select **Run in Cloud (Windowed)**.

If an application asks you to agree to terms and conditions, select **I agree**.

- 2 Select **Open** when the prompt appears.

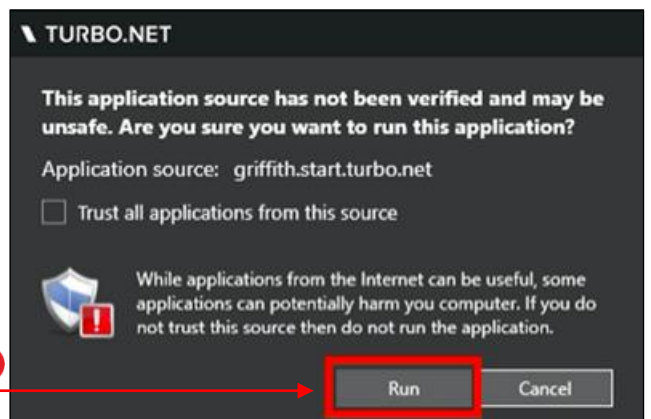

- 3 Select **Run**. The application will connect and then open in a new window.

- 4 Access and save your data to **T:\OneDrive** when using **Run in Cloud (Windowed)** mode. Your OneDrive folder will be available as **T:\OneDrive**. You will also have access to open and save data on your local hard drive.

## Step 3: Run on my PC (Local) – suitable for Windows PCs

- 1 Right click the icon for the application you wish to run and select **Run on my PC (Local)**.
- 2 Select **Open** when the prompt appears.
- 3 Select **Run**. The application will download on just the first time you run it. The download time will vary according to the application size.
- 4 The application will now be stored on your computer. On subsequent starts you will still need to success the application by logging in to **Turbo.net**.

## Step 4: Remove locally cached applications from your PC

- Applications can be removed from your PC to free disk space.

- 1 Select the **Windows Start button** and go to **Turbo.net Preferences**.
- 2 You can remove the application of your choice by choosing **Clear** or remove all applications at once by choosing **Clear Cache**.
