

QUEENSLAND HEAT HEALTH COMMUNITY OF PRACTICE

A professional group focused on increasing awareness, investment and uptake of heat adaptation policy across Queensland

About Us

The Queensland Heat Health Community of Practice (QHHCop) intends to improve local collaboration across sectors to assist and manage heat health related issues facing Queenslanders.

Objectives

- Establish a resource platform to share key research findings and how they apply in the local context
- Provide opportunities to inform research
- Facilitate multi-sectoral collaboration

Year 1 outcomes

01

Establish an Advisory Group

To help drive the project

02

Host 4 events

With time for networking and discussions/Q&A

03

Pilot a digital platform

For resource storage and online interaction

04

Sustainability plan

To sustain the QHHCop after the first year
