

21st
BIRTHDAY

Institute for Glycomics

*Fighting diseases
of global impact*

About us

Griffith University's Institute for Glycomics is one of Australia's flagship multidisciplinary biomedical research institutes, comprising over 200 researchers, postgraduate students and support staff. Our unique expertise centred around glycomics research makes us the only institute of its kind in Australia and one of only a handful in the world.

Our vision

To be a world leader in the discovery and development of novel drugs, vaccines and diagnostics through the application of innovative multidisciplinary science in a unique research environment.

Our mission

Fighting diseases of global impact through discovery and translational science, including cancers and infectious diseases.

STUDY WITH US

Consider a future in research & help fight diseases of global impact

Did you know?

- More than 17 million people die from infectious diseases every year
- More than 9 million people die from cancer every year

Do you want to help reverse these alarming statistics? Do you want to contribute to a future free from cancer? A future free from diseases like influenza and COVID-19? So do we.

The Institute for Glycomics, based at Griffith University's beautiful Gold Coast campus, offers a range of exceptional Honours, Masters and PhD opportunities for the nation's future scientists.

Study alongside some of the world's most experienced and well-known research leaders and scientists. Not only would you have access to our state-of-the-art research equipment and facilities, but you would also be living and studying within one of the most beautiful cities in the world. And best of all, considering a career in biomedical research could quite literally change the world.

*Research provides hope. Hope in the fight against disease. Hope for our future.
Help us change the world.*
