

### Introduction

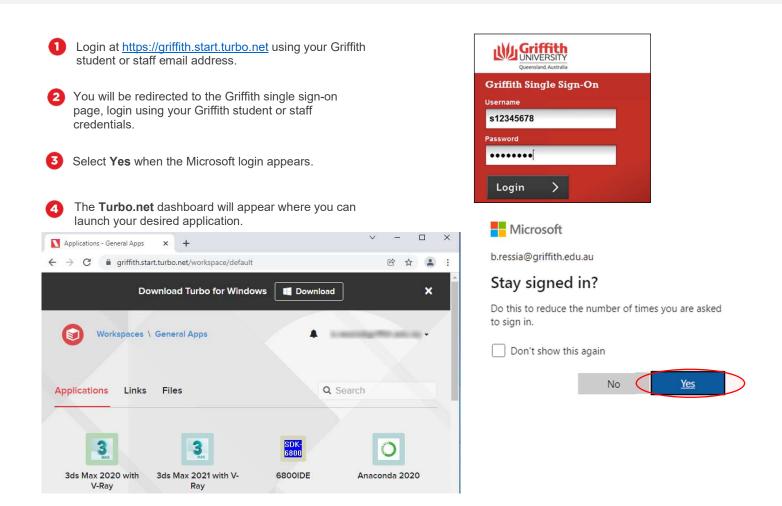

This guide will show you how to launch an application from Turbo.net in any of its three modes:

- Run in Cloud (HTML5): Available on Windows, Linux and MacOS. You will be connected via your web browser to an
  application running on a remote server. Connect your OneDrive to Turbo.net and save all data to your T:\OneDrive. For
  more info, see the Saving Files In Turbo.net section; <u>https://www.griffith.edu.au/student-computing/using-your-owndevice/</u>
- 2. Run on My PC (Local): Available only on Windows PCs and virtual machines. The application will be downloaded to your hard drive and started. The application will use local resources such as RAM, processor and graphics and have access to open and save files on your local drive. You must first install the Turbo.net desktop app to launch an application in Local mode.
- 3. Install On My PC: Available only on Windows PCs and virtual machines. A shortcut to the application will be added to your start menu and downloaded to your hard drive on first run. The application will use local resources such as RAM, processor and graphics and have access to open and save files to your local drive. You must first install the Turbo.net desktop app to launch an application in this mode.

**Note; Some** software, such as SPSS, SolidWorks, Autodesk Products require Griffith VPN access when using local modes. See <u>Griffith VPN webpage</u> for instructions on how to install and configure Griffith VPN on your computer.

**NOTE for M1 Macs**; Bootcamp and virtual machines running x64 Windows are not officially supported on M1 chip Macs and running applications in local modes from Turbo.net is not supported. **Run in Cloud** is supported for M1 Mac users. Be aware that, for technical reasons, not all applications are available in Cloud mode. All applications in Turbo.net are available on student computers found on campus.

## Step 1: Access the Turbo.net portal

# Step 2: Run in Cloud HTML5 (suitable for all devices)

0	Right click the icon for the application you wish to run and select <b>Run in Cloud (HTML5).</b>		Cloud (HTML5) Cloud (Windowed)			
	If an application asks you to agree to terms and conditions select <b>I agree</b> .		My PC (Local)

### Step 2: Run on my PC (Local) – suitable for Windows PCs and VMs

• Started from the application icon in the Turbo.net portal.

Note; Software such as SPSS, SolidWorks, Autodesk Products require Griffith VPN access. See <u>Griffith VPN webpage</u> for instructions on how to install and configure Griffith VPN on your computer.

- Login at <u>https://griffith.start.turbo.net</u>.
- 2 If not already installed, select the **Download** button at the top of the portal and install the **Turbo.net Client**.
- Right click the icon for the application you wish to run and select **Run on my PC (Local).** 
  - Select Open Turbo.net for PC when the prompt appears.

Select **Run**. The application will download on just the first time you run it.

- 4 The application will now be downloaded and stored on your computer. The download time will vary according to the application size.
  - On subsequent starts you will still need to start the application by logging in to **Turbo.net** and starting from the application icon in the portal

For more information contact: **Digital Solutions | Corporate Services** Ph (07) 3735 5555 (Brisbane) | (07) 5552 5555 (Gold Coast) Email <u>ithelp@qriffith.edu.au</u> griffith.edu.au/digital-solutions

#### **Install On My PC** Suitable for PC's and Windows Virtual Machines only.

- Install an icon in the Start Menu to start application in future.
- Due to licensing restriction, not available for all applications.

Note; Software such as SPSS, SolidWorks, Autodesk Products require Griffith VPN access. See <u>Griffith VPN webpage</u> for instructions on how to install and configure Griffith VPN on your computer.

If you have previously started your application using **Local Mode**, you may need to restart your PC before it will start from the Start Menu shortcut.
