

**Join us on the walkway
to a cancer-free future**

We invite you to be part of a visionary journey towards a cancer-free tomorrow. The Institute for Biomedicine and Glycomics proudly announces the launch of our “Walkway to a Cancer Free Future”, an innovative pathway to hope, healing, and homage. In support of world leading cancer research at the ACRF International Centre for Cancer Glycomics within the Institute, and inspired by our community, we are dedicated and unified in realising a future, free of cancer for generations to come. Tile by tile, your support is a beacon of hope and actively contributes to the battle against cancer.

The vision

Our vision is to create a tangible symbol of progress and perseverance in the face of cancer. The Walkway will be a tribute to the resilience and courage of our community, and a testament to the support of those who want to make a difference. The wall is positioned along the corridor to the entrance of the ACRF International Centre for Cancer Glycomics. Strategically positioned, this wall serves as an invitation to our community, to contribute to helping us build this walkway; tile by tile and in tandem, reminds our cancer research teams of the community support propelling their discoveries forward; a collective commitment toward a cancer free future.

Purpose and impact

This initiative seeks to raise **\$500,000** for cancer research, directly contributing to advancements in diagnosis, treatment and potential cures. It is a unique opportunity to acknowledge the generous contributions of our donors, encouraging others to follow in their footsteps, linking arms with each other on this walkway, towards significant impact in our fight against this insidious disease.

Your role in this journey

We warmly invite you to join us in the battle against cancer. Contributing to critical cancer research and helping to build our walkway, tile by tile. Each tile will serve as a permanent marker of your commitment to a cancer-free future, and an inspiration to the many visitors and members of our Institute. This is your chance to be part of a legacy of hope and innovation.

Why now?

The Institute for Biomedicine and Glycomics stands at the forefront of cancer research, bolstered by a leadership team deeply committed to philanthropy and an equally committed volunteer board, led by The Honourable Rob Borbidge AO. With a deep connection to our immediate and broader community, the Walkway to a Cancer Free Future offers an unprecedented platform to encourage others to link arms with us in this endeavour.

Valued support

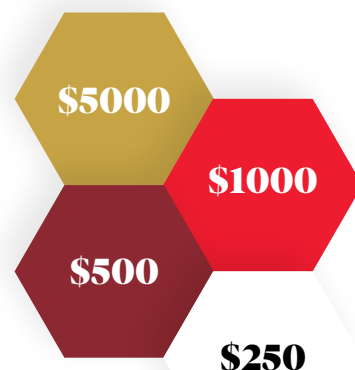

This initiative is fully supported by Griffith University. Our community partners, supporters and donors play a crucial role in helping to support our cutting-edge research. Your help building this walkway will play a vital role in helping progress our cancer research. Your support will help make a difference to the health of both current and future generations.

Join the movement

The “Walkway to a Cancer Free Future” is not just a path within our institute; it is a journey we embark on together towards a world without cancer. With the dedicated efforts of our Biomedicine and Glycomics Executive, business team, research leaders, and the unwavering support of our community, we are poised to make a significant impact.

Your support can pave the way to a brighter, cancer-free future. Let's walk this path together.

To make your donation to the wall, please visit griffith.edu.au/institute-glycomics/support-us/donate or scan the QR code, complete the BLUE field with your donation amount (\$250, \$500, \$1,000, or \$5,000), fill in your personal details, and select the “Walkway to a Cancer Free Future” option. For any queries please contact our Institute for Biomedicine and Glycomics Advancement Manager, Jamie Endelman: j.endelman@griffith.edu.au

Together, we can make a difference. Together, we walk towards hope.
