

How to...

Download Turbo.net on a Mac

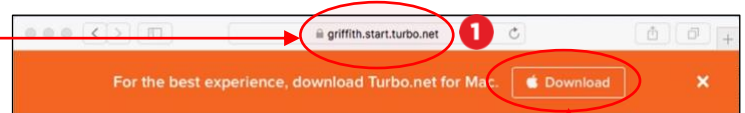

Introduction

This guide will show you how to download and install the Turbo.net application on a Mac. Turbo.net allows you to access your course software from your personal device. Please note that some screen captures

Please note that to launch applications in Windowed mode, the Turbo.net desktop app must be installed on MacOS computers. HTML5 mode does not require the desktop app.

Step 1: Download and install Turbo.net

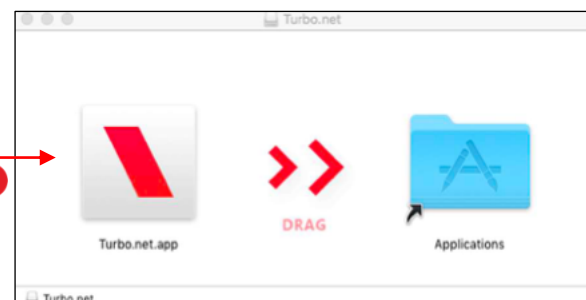

- 1 Login at <https://griffith.start.turbo.net>.

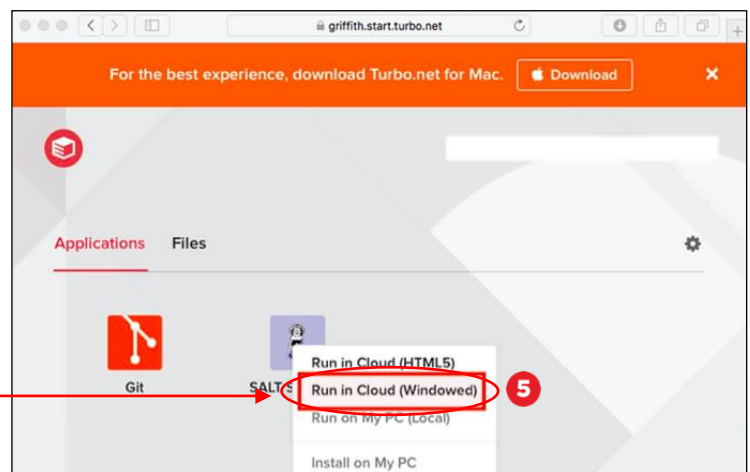

- 2 Select the **Download** button at the top of the portal.

- 3 Once the download completes, go to your **Downloads** folder and double-click the **Turbo-client.dmg** file.

- 4 When the file opens, drag the **Turbo.net.app** file to the **Applications** folder.

- 5 You will now be able to connect an application in **Windowed** mode (right click on your desired app and select **Run in Cloud (Windowed)**).

Step 2: Connect OneDrive to your Turbo.net account

- 1 Select the **Files** tab.
- 2 Select the **Connect** drop-down menu and then **OneDrive**.
- 3 When the **Permissions requested** screen appears, select **Accept**. You are now connected to your **OneDrive**. In **Windowed** mode you can also access files from your local user profile on MacOS.
