

ARC Industrial Transformation Research Hub:

Digital Transformation and Workforce Development

Is your company in danger of being left behind by digital disruptions?

How will you remain a leader in your industry and stay ahead of the curve?

The future is now.
Digital convergence is here,
and organisations need to adapt.

To remain competitive, Australian businesses must respond to widespread digital transformation. Work with us to shape new business models and future skills for your workforce.

The future of work involves organisations rethinking their practice, systems, products, and relationships due to digital transformation. The challenge is to step outside established practice and create a vision of digital transformation unhindered by convention and existing industrial environments.

For details and to be part of futureproofing for a digital world visit:

Griffith University and Deakin University are working in partnership for a national research and training centre focused on digital transformation and workforce development, to enable Australian companies to best prepare and thrive in a digital future.

Collaborate with us to create strategies to exploit emerging technology whilst mitigating against potential threats and disruption. We will help prepare your business for digital transformation with all its benefits and avoid its pitfalls.
