How to…
Connect to Research Vault from Mac

Introduction

The Griffith Research Vault provides archival storage of digital data that is infrequently used, but stored for long-term retention.
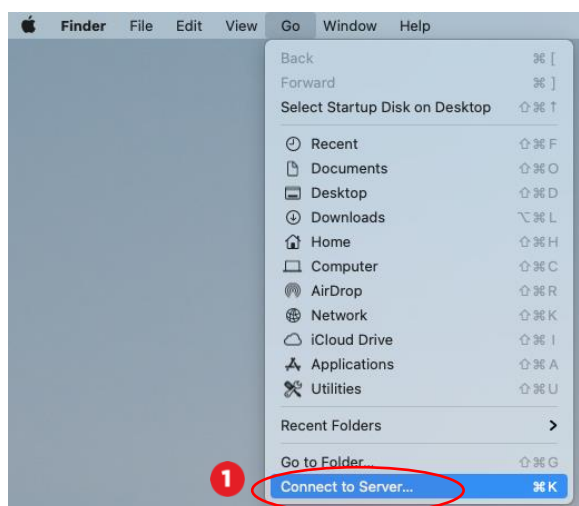

Once you have been provided access to a Research Vault folder "{Share name}" you will need to follow these instructions to map a drive so you can connect from your Mac.

IMPORTANT:

When entering Griffith credentials always login using ***staff\sNumber*** (e.g. staff\s123456) and your portal password.
If connecting from home, you must connect using Griffith VPN. You can only connect from a home/personal computer if it complies with your research ethics.
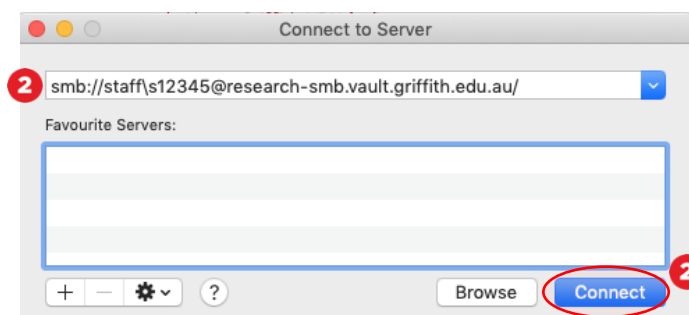

Step 1: Map network drive for Research Vault

1 From **Finder** select the **Go** menu item, then use the **Connect to server** option on the menu dropdown.

2 In the Connect to Server window, enter **smb://staff\{s#####}@research-smb.vault.griffith.edu.au** as the folder address.

For example smb://staff\s12345@research-smb.vault.griffith.edu.au

Click **Connect**.
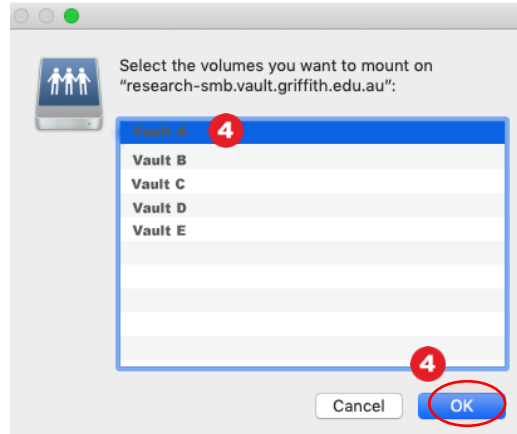

3 Enter Griffith credentials

Username: **staff\sNumber**
Password: **Griffith Portal password**

Click **Connect.**

4 When prompted, click to select the Research Vault to mount.

Click **OK**.

5 You will then be able to access your Research Vault from your Mac.
