

HOW TO MAKE A BALLOON GIRAFFE:

STEP 1

Make the first twist (A) 15cm from the tied end of the balloon. This will be your giraffe's nose.

STEP 2

Make two more twists (B and C) to create two 5cm sections. Line up the points where you twisted A and C and twist them together at the join to lock this twist.

STEP 3

Make your next twist (D) to leave a long 12cm section – this will be the giraffe's neck.

STEP 4

Now make two more twists (E and F) each 12cm apart. These will be your giraffe's two front legs. Line up the points where you twisted D and F and twist the joins together several times to form a lock twist.

STEP 5

Leave a 15cm section then make your next twist (G) to make your giraffe's body. Make two more twists (H and I) – making two 10cm sections. To make the giraffe's back legs, line up the points where you made twists G and I and twist the joins together to form a lock twist. This will be your giraffe's back legs.

STEP 6

This just leaves the last section – your giraffe's tail. Adjust its angle so it's poking upwards, and your balloon giraffe is finished!
