# Mobile Connect App

The Gallagher Mobile Connect App allows users to open doors, perform actions and store Digital IDs with their mobile device.

## Mobile Connect App

Mobile Connect interfaces directly with Gallagher's T-Series Multi Tech readers, allowing users to:

- Store access credentials for multiple sites
- Use long range access with Bluetooth® wireless technology
- Store their fingerprint or PIN data on the mobile device, privately and securely using FIDO open standard authentication security
- Interact with building systems and perform actions such as turning on lights or heating, opening doors remotely or setting alarms
- Receive important site notifications on the devices lock screen and click to view additional detail.

## Convenient credential management

Every Command Centre license receives five free mobile credentials. Setup and provisioning for users is a simple process, as is the management of mobile credentials within Command Centre. Benefits include:

- Eliminating the replacement cost of lost/stolen cards (including the time spent on administration). Users are less likely to lose their mobile device than an access card
- Remote provisioning, allowing access to be set up in advance of a user attending site. Perfect for managing temporary site users (e.g. contractors). Schedule when credentials are enabled and expire
- Two factor authentication for added security. If required users can be directed to use a second authorization step (like fingerprint or PIN) on the mobile device to gain access to select areas

## Secure Mobile Access

Downloadable from the Apple App and Google Play stores, Mobile Connect allows mobile devices to be used as access credentials with Gallagher T-Series and Salto BLE* readers.
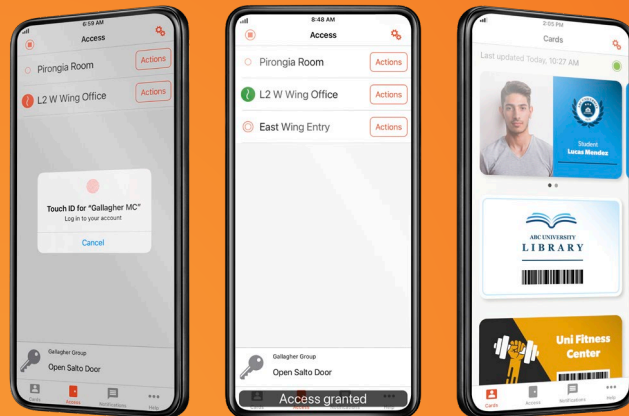

## Control your Environment

Mobile Connect makes it possible for users to perform a number of tasks such as arming an Alarm Zone, changing the Access Mode for a door,turning on lights and air conditioning, or logging on to readers to perform alarm management functions. Anything that a system output can do can also be done from Mobile Connect when in range of a Gallagher Bluetooth® Multi Tech readers.

## Mobile Connect Digital ID

Mobile Connect provides the ability to have a secure, on-phone digital alternative to the traditional ID card. Mobile Connect Digital ID's:

- Can be issued remotely and securely, reducing the need for physical contact
- Remove the need to print physical ID cards and maintain printers to do so
- Eliminate the cost and inconvenience of replacing lost or stolen ID cards
- Allow for multiple cards to be issued and stored on the one Mobile Connect credential
- Increase the convenience for users and reduce the likelihood of ID's being forgotten, lost or stolen.

## Secure Mobile Credentials

Using the FIDO Certified authentication the Gallagher platform ensures that user credentials are safe and secure using a globally recognized method of authentication.

*Requires Gallagher Command Centre v8.10 or later

| Mobile Connect App | | |
|---|---|---|
| Product detail | Credential | Mobile Connect Credential |
| | Security | FIDO authentication, using pre-shared asymmetric keys with elliptic curve cryptography (P256) |
| Minimum requirements | iOS: | 12 and above |
| | iPhone: | 5s and above |
| | Android: | 6.0 and above (short range access decisions via NFC are supported from Command Centre v7.80) |
| | Command Centre: | v7.60 and above (v8.10 or later for Salto BLE readers) |
| | Access Hardware: | Gallagher multi-tech readers, Gallagher C6000 Controller |
| Additional notes | **Cloud provisioning subscription** | |

**Cloud provisioning subscription**
Once issued, credentials function indefinitely upon the devices they are sent to. An annual subscription allows for site managers to reissue credentials to users who may need to replace their phones*. Gallagher, in partnership with Nok Nok Labs will endeavour to maintain compatibility with new devices and their associated software updates as they are released.

*A fair use policy applies, allowing an average of four credential issuances per licensed credential. Please discuss additional options with your Gallagher Business Development Manager should you wish to exceed fair use guidelines.*
